MEMORANDUM FOR: OSI Division Chiefs

SUBJECT: Clandestine Scientific and Technical Operations Course

1. Attached are copies of a preliminary outline for the DD/I portion of the Clandestine Scientific and Technical Operations Course scheduled tentatively, to begin on 6 April 1959. It will be noted that, based upon comments received from participants in the first course, changes have been made from the previous outline.

2. The Office of Training has stressed the importance of the OSI contribution to this course, stating that our effective participation is essential to attainment of its objectives. Dr. Scoville has reiterated his wish that the OSI contribution be carefully prepared and as responsive to the desires of the Office of Training as is possible.

3. As indicated above, changes have been made in the outline used for the first course. In the case of several OSI Divisions, a rather complete reorientation and re-working of their previous presentation will be required. It will be necessary for all divisions to prepare a preliminary outline, in some detail, of their portion of the presentation, for review by the Office of Training. After approval of this outline by OTR, it may be necessary, in some cases, to prepare in abbreviated form, the text of certain lectures and presentations.

STATINTL

4. [REDACTED] OSI Training Officer, assisted by the Collection Staff, will coordinate OSI participation and will consult individually with Division Chiefs regarding the attached outline and will explain in detail the action required by each division.
